

SoBR 2010 Data				
Story	Data Used	Data Source	Indicator	Data for next time / Data source
FOCUS: NATURAL RESOURCES	Habitat Restoration	- Acreage of habitat restored	- SMBRC	
		- Connectivity between existing riparian communities	- No source	
		- Water quality on restored site (Las Virgenes Creek)	- No source	
		- Miles of accessible habitat for salmonids	- No source	
		- Water quality on restored site (Malibu Lagoon)	- No source	
		- Invasives removed and natives planted	- No source	
		- Kelp density	- SMBK	
	Invasive Species Control	- List of problematic terrestrial, aquatic and marine invasive species	- BPJ (Topel, Miller, Maloney)	
		- Distribution of New Zealand Mudsnail	- SMBK surveys	
		- Crayfish trapped	- Katz (2008)	
		- Newt egg masses observed	- Katz (2008)	
	Remediation of Contaminated Sediments on the PV Shelf	- Concentrations of DDT in surface sediments	- EPA	
	Species of Special Interest	- Species of special interest list	- CDFG, SMBRC, and Audubon Society	
		- Reappearance of El Segundo Blue Butterfly	- Longcore 2005	
- Number of least tern nesting pairs		- Audubon surveys		
- Number of family groups of Belding's savannah sparrow		- CLA-EMD surveys		
- Wintering population of western snowy plovers		- OSPR surveys		

SoBR 2010 Data				
Story	Data Used	Data Source	Indicator	Data for next time / Data source
Fish, Fishing, and Fishery Management	- Number of giant seabass observed	- VRG surveys		
	- Number of steelhead trout in Malibu Creek	- RCD surveys		
	- Map of feeding locations of marine mammals in SMB	- Bearzi observational studies		
	- Landings of kelp bass	- CDFG		
	- CPUE of kelp bass	- CDFG		
	- Density of kelp bass	- VRG surveys		
	- Kelp bass densities at different sites in SMB	- VRG surveys		
	- Commercial landings of white seabass	- Allen 2007 paper		
	- Commercial and recreational landings of Halibut	- CDFG		
	- CPUE of Blacksmith	- CDFG		
- Density of Sheephead at Rocky Point	- VRG surveys			
Marine Protected Areas	- None	- None		Trophic structure, Unfished species populations, fish size, fish diversity, fish density, ecosystem resilience
